2. Clean and disinfect scrubber handles/control buttons
3. Clean and disinfect iPad and MDT
4. Clean and disinfect baler doors and touch points for operations

Rear Exterior

1. Clean and disinfect doors and locks
2. Clean and disinfect doorbell
3. Clean and disinfect dumpster handles of doors, handles and gates and locks

MediClean® Disinfectant Spray Plus

MediClean Disinfectant Spray Plus is a water-based bactericide, fungicide, deodorizer, and antimicrobial all in one unique formulation.

One application kills disease-causing germs, fungi, mold, viruses and mildew. It kills COVID-19, odor-causing bacteria, including gram negative bacteria - the bacteria encountered in sewage backups and toilet overflow situations.

BIOPROTECT | BioSafe

BIOPROTECT™ is an EPA registered, water-based, antimicrobial technology that provides persistent and continuous protection. BioSafe Multisurface Purifier is the consumer grade version of BIOPROTECT 500. BIOPROTECT is a preservative antimicrobial coating that can be applied to both porous and non-porous surfaces to inhibit the growth of odor causing, and stain causing bacteria.

BIOPROTECT's patented antimicrobial technology uses self assembling monolayers to create a field of nanospikes that mechanically kill microbes (bacteria, molds, viruses) by piercing and rupturing their cell membrane. This kill method prevents microbes from mutating and adapting inhibiting the ability for superbugs to grow.

Bound Technology: Unlike conventional disinfectants, poisons, phenols or heavy metals, our technology performs while bound to the applied surface (substrate.)

Residual Efficacy: Unlike other antimicrobials, our product's efficacy remains active on surfaces for up to 90 days

Large Spectrum Efficacy: Effective against mold, mildew, algae, fungus and viruses

Unmatched Versatility: Can be applied on almost any surface (both porous and non-porous)

Water Based Formula: BIOPROTECT is a completely water-based formulation. It is easily used by field personnel using a basic spray bottle, or a high fogging system

Unrivaled Safety Profile: BIOPROTECT uses ZERO Triclosan, heavy metals, arsenic, titanium, phenols or poisons
